Charlevoix Rayder Dual Co-Curricular Agreement

Student-Athletes Name: _____Date: _____

Primary Sport: _____ Secondary Sport: _____

Student-athletes in grades 7-12 are allowed to participate in two sports or extracurriculars during the same season provided the following criteria are met:

1. Mandatory meeting with students, parent(s), coaches from each group activity, and athletic director to establish expectations for the season
2. The student-athlete selects a primary extracurricular and a secondary extracurricular
3. The student-athlete, their parents, and all coaches involved sign the dual co-curricular agreement prior to the first season contest
4. If a student wishes to change primary/secondary extracurricular status, it must be agreed upon by all parties involved and take place no later than 6 weeks into the season

The following criteria will be used to determine which sport takes priority in the event of a scheduling conflict.

Contest vs. Contest

If contests are scheduled for the same day in both activities, the primary activity will take priority over the secondary activity with the following exception.

All MHSAA state tournaments are a priority regardless of which sport is the first sport. If both teams are participating in an MHSAA tournament on the same date, no attention to the level of the tournament (districts, regional) shall be given and the primary activity is the priority. State tournaments are a priority over conference tournaments.

Contest vs. Practice
All student-athletes are expected to participate in all contests (primary or secondary) regardless of a conflict with practice. A contest ALWAYS takes priority over practice. If contests are rescheduled for any reason and it creates a same-day conflict, the preceding rule shall be implemented. ***No athlete shall be punished for missing a practice due to participation in a contest for his/her dual activity.***

Practice vs. Practice
Coaches and the athletic director should make every effort to arrange practice times so that dual-activity student-athletes can participate in both practices. If practice times overlap, the primary activity's practice will have priority.

By signing below, we agree to uphold the dual activity participation requirements and guidelines stated above:

Student/Athlete Signature: _____

Parent/Guardian Signature: _____

Primary Coach Signature: _____

Secondary Coach Signature: _____
