

# Montana Wrestling Officials Study Club 2025-2026

## **Welcome back to the mats, everyone!**

With each passing year, we continue to expand this study club format to continually support our officials to improve their skills and abilities as wrestling officials. This year, we are looking to revise some of our content structure to offer new material to our current group of officials. The intent here is to introduce new talking points to benefit our existing our officials, while also providing material necessary to prepare newer officials.

## **Structure**

In the past, we have posted study club content in a precinct format. However, due to the variety in how pools run their study clubs I have instead posted primary and secondary topics with content for the pools. In this regard, each pool can look at the content and cover it in their own preferred way.

There is material available in this structure for the first study club to be the rules clinic and then 6 content areas that can be run in 6 meetings or divided out into more broad topics to create more study clubs if the pool leader so chooses.

Note: While a minimum of only six study clubs is required, offering more allows flexibility for our diverse group of officials in our state while also allowing easements for travel requirements. This structure is only a recommendation, and we encourage each pool to adjust as they see fit.

## **Intent**

A point of emphasis is encouraging mat time for officials. The ability to go through the motions and demonstrate scenarios and situations is crucial in developing all officials. Whether you choose to incorporate this element or not, we have also found success in reviewing films while in the precinct setting. The presenter of a segment is encouraged to introduce a variety of content for the benefit of their group; however, any film by MOA officials must be approved before being shown. Criticism/negativity has no place in this, as the opportunity to replay situations for officials can help them and others down the road.

Good luck to everyone this year, and we will see you on the mats!

# Montana Wrestling Officials Study Club

## 2025-2026

### **Resource Library:**

The following material is intended to serve as a starting point to dive deeper into various topics for wrestling officials. If you or your club has material contributing to one of the following categories, please submit it to be added to the resource library. I encourage all of you to spend some time and watch the videos that have been populated in the NFHS Learning Library (<https://nfhslearn.com/library/videos>). There is a new online course with a curriculum consisting of 13 sections (approximately two-hour completion time) and 41 videos uploaded.

### **NFHS Illustration Library (Link to Google Drive):**

Session # 1

## **Precinct Theme:** Rules Clinic and Changes in the Rule Book

- New this year, there is a general and a sport specific rules clinic that will need to be watched by each individual official.

# Montana Wrestling Officials Study Club 2025-2026

Session # 2

## **Precinct Theme:** General Mechanics, Signals, and Preventative Officiating

	<u>Primary Topic</u>	<u>Secondary Topic</u>
Topic	General Mechanics, Signals, and Preventative Officiating	2025 Wrestling Pre-Season Guide
Leader(s)		

### **Primary Topic:**

*General Mechanics, Signals, and Preventative Officiating:*

Signals are the official's means of communication

1. Know the signals
  - a. Signals/mechanics are one of the few things officials can control
  - b. Know the signal that needs to be executed in EVERY situation
  - c. Practice, practice, practice – so you don't have to think about signals
2. Improving your signals
  - a. Practice in front of a mirror
  - b. Watch videos
  - c. Time near fall counts w/ a stopwatch
  - d. Vocalize (LOUDLY)
  - e. Have a mentor who will be HONEST with you
3. Timing
  - a. The "how" and "when" of the signal is what makes you elite
  - b. Timing is affected by position (or being out of position)
  - c. Timing can be affected by "overthinking"
  - d. Don't be 1) too early, 2) too late or 3) at the wrong time

POSITION + PATIENCE + POISE + PRESENTATION

Other areas that will improve your use of signals (in order of importance)

1. Position
  - a. Being in proper position is PRIMARY focus
  - b. STAYING in position allows you to SLOW THINGS DOWN
  - c. You are only as good as your position – don't be too close...don't chase...
2. Patience
  - a. Let the situation develop (especially in scrambles)
  - b. Patience promotes proper timing
3. Poise
  - a. Comfort and confidence in all situations can make all the difference
  - b. Achieving #1 and #2 above will provide that confidence

# Montana Wrestling Officials Study Club

## 2025-2026

### 4. Presentation

- a. Have PERFECT timing, delivery and execution of signals

POSITION yourself to see the call. Once in position, be PATIENT. Remain POISED as the situation develops. PRESENT your signals flawlessly.

### Mechanics for Specific Situations:

- Have a LOUD whistle. Start whistle is quicker/shorter than stoppage whistle
- Hand motions for starts (neutral/top/bottom position) should be the same
- Hold points HIGH and ROTATE your hand
- Keep fingers HIGH and THUMB TUCKED
- Do not put your hands on your knees or your hips
- Use the stop signal any time you stop the action INCLUDING the out of bounds call
  - Stalemate – stop the match then indicate stalemate signal (Signal #14) with THUMBS UP and HANDS AGAINST CHEST
  - Potentially Dangerous – stop match then indicate color of potentially dangerous (Signal #13)
  - Penalties/Infractions – stop match, indicate infraction and corresponding points
  - Stalling on Offensive Wrestler – stop match, signal stall (Signal #16). Only exception should be rear standing.
- Award points in the following instances:
  - Reversal – award the points BEFORE signaling reversal (Signal #18)
  - Escape – award point BEFORE signaling neutral (Signal #8)
  - Near-fall – award the points BEFORE signaling near fall (Signal #21)
- Neutral out of bounds:
  - Blow whistle, signal stop action and then signal out of bounds (Signal #10)
- Choice of Position
  - Use a system that works for you and allows you to track choice of position during dual meets
  - Officials have different preferences – some use a disk in the front pockets, some use a disk in the back pockets, some use wristbands or something under the wristbands
  - DO NOT USE DISC to indicate who has choice of position – use wristbands
  - After you flip the disc, LEAVE IT ON THE MAT until after choices have been made – then pick it up and return it to your pocket

### Discuss Preventative Officiating

- Consider tactics that prevent situations from becoming potentially dangerous or illegal
- Use verbal commands that don't signify a specific wrestler, such as:

# Montana Wrestling Officials Study Club

## 2025-2026

- “Action”
  - “Center”
  - “Offense”
  - “Improve”
  - “Still Neutral”
  - “Green is in control” or “red is in control”
  - “Contact”
  - “Fingers”
  - “Keep it Legal”
- 
- NEVER turn your back on the wrestlers. Always keep your eyes on them – stay between them after an out of bounds situation.
  - If the action between wrestlers becomes overly aggressive, stop the match and warn the wrestlers that such behavior will not be tolerated
  - Stay in between the wrestlers in neutral to help prevent false starts. Point to the lines to signify you’re not starting the match until they’re both on their lines.
  - Move in closer when the offensive wrestler is applying pinning combinations such as arm bars, etc., to be in position to prevent a potentially dangerous or illegal situation.

### **Secondary Topic:**

Walk through and discuss topics in the Pre-Season Guide.

# Montana Wrestling Officials Study Club 2025-2026

Session # 3

## **Precinct Theme:** Official's Mechanics in Neutral Position + Penalty Chart

	<u>Primary Topic</u>	<u>Secondary Topic</u>
Topic	Officials Mechanics in Neutral Situations	Penalty Chart Overview
Leader(s)		

### **Primary Topic:**

#### Wrestler's Position in Neutral Start

- Both wrestlers must have one foot ON their respective starting line and the other on or behind the line extended
- Wrestlers cannot touch each other or the mat in front of their front foot prior to start
- Both wrestlers must be stationary (no rolling starts)
- Don't shake hands w/ the wrestlers unless they initiate shaking hands with you

#### Neutral Starting Mechanics

- Step between the wrestlers w/ outstretched arms between the starting lines – do not interfere w/ the wrestlers
- Make sure you have visual acknowledgement from the timekeeper prior to starting
- Verbally “set” the wrestlers
- Sound the whistle loudly and sharply while making visual arm motion to start the match (Signal #1)
- Move out quickly to a proper distance (10-15 feet) and adjust position according to the action. Glance at clock to ensure it has started. Keep wrestlers in view as you back out.

#### Neutral Standing Position

- Be far enough away to observe the action and not interfere w/ sudden changes in position
- Move in closer to observe potentially dangerous/potentially illegal holds
- A distance of 10-15 feet is recommended – a further distance provides a broader perspective
- Anticipate how takedowns will finish so that you can remain out of the way and observe when control is established
- Continually work to improve your position, situate yourself between the wrestlers as they're facing each other

# Montana Wrestling Officials Study Club

## 2025-2026

- Move to either side to observe scoring situations and hand fighting
- ANTICIPATE ACTION– understand where you should go NEXT
- DO NOT CHASE – stop and let the action come to you. Consider moving counter to the wrestler’s rotation to be more effective.
- CHANGE LEVELS to be in proper position to observe potentially dangerous/illegal moves; bend knees – drop hips.
- VERBALIZE the awarding of takedowns – move in, lower your level – this allows the scoring wrestler to release locked hands and/or avoid stalling situations. VERBALIZE who is in control.
- Award points in a confident manner ONLY USING approved hand signals. Arm should be extended overhead while rotating points (Signal #22)
- Maintain eye contact on the wrestlers – trust the table to do their job correctly and keep your focus on the wrestlers.

### Neutral Boundary Line Situations

- BEAT THE WRESTLERS TO THE BOUNDARY LINE – be in position to determine the location of each wrestler.
- Position yourself on the “tangent of the line” to view the action and the line to see when the wrestlers cross the boundary line.
- Maintain proper distance and keep moving – be in position to observe if either wrestler touches OFF the mat surface.
- Be patient; do not anticipate an out of bound situation occurring. Hold your whistle until you are sure a situation finishes out of bounds.
- Call out of bounds by the rule and be consistent. Use proper hand signals (stop action and then out of bounds) with simultaneous whistle.
- Always keep safety in mind if you are in tight space due to walls, bleachers, chairs, etc. You may have to stop the match early in these instances.
- When possible, signal the earned points, and then blow the match out of bounds. Doing this creates an impression of confidence among coaches.
- Be verbal when action moves to the boundary. Words such as “center” or “action in bounds” keep stalling calls from being a “surprise” to coaches.

### Neutral Scramble Situations

- Keep working to achieve and adjust to the best possible position to observe positions where control may be established. Often, it is best to adjust your position by going in the opposite direction of the action.
- Don’t get in a hurry. In neutral scrambles let the action burn and keep calm.
- If the action heats up or time becomes a factor, take a few steps back and take a deep relaxing breath.
- Don’t award a takedown until control has been established beyond reaction time.
- When control is established award the points and be loud enough so that the wrestlers can hear your call.
- If there is no control, you can indicate no control using the authorized signal (9). Locking the arms out for no control or “airplaning” the no control signal does not

# Montana Wrestling Officials Study Club

## 2025-2026

look good. Instead, indicate no control, bring the arms down and then 5-6 seconds later repeat the sequence.

### **Secondary Topic:**

Go over the Penalty Chart Sequence and discuss areas of interest to your pool.  
Potential Topics include:

*Illegal Holds:* From the book, go over the definition and correct application of each illegal hold mentioned. Demonstrate the move and discuss the illegal action associated with each. This station should be verbal, visual, and tactile. Be sure to discuss how the official handles each situation to ensure the safety of the wrestlers.

*Potentially Dangerous:* After discussing illegal maneuvers, discuss actions that are not illegal but will require special attention from the referee. Once again, cover all material listed in the rule book and demonstrate each.

*Technical Violations:* Go over each technical violation listed. Demonstrate each and discuss the enforcement of each penalty as it applies to wrestling action. Play out situations from the casebook in a practice match with an official on the mat. Going through the motions rather than just discussing them can benefit visual learners. Additionally, discuss the application of the call in live wrestling and any implications.

# Montana Wrestling Officials Study Club 2025-2026

Session # 4

## **Precinct Theme:** Mechanics in Mat Wrestling and Near-fall Situations

	<u>Primary Topic</u>	<u>Secondary Topic</u>
Topic	Mechanics in Mat Wrestling	Mechanics in Near-fall Situations
Leader(s)		

### **Primary Topic:**

Start of the Top/Bottom Wrestling Positions:

- The goal of beginning action in this position is for to be FAIR to both wrestlers, NOT PERFECT.
- If you have a larger than average number of cautions, it is probably your fault.
- The hand movement should be the same as the start of the match in the neutral position.
- The purpose of the hand motion is to indicate to coaches, timers, and spectators that action has started.
- You should position yourself at an angle at either 10 or 2 o'clock (rotate positions between starts)
- The referee should be standing and stationary when starting the action in the top/bottom position.
- Once the wrestlers are set briefly pause then blow the whistle in a commanding way. Stay stationary so that your movements do not create false starts.

Movement as wrestling continues

- After action starts the official is most often in the best position in front of the action toward the heads and slightly off to the side of both wrestlers.
- 10 to 12 feet is often the best distance to view wrestling in the offensive and defensive position.
- Be prepared to quickly move in to stop potentially dangerous positions before they become illegal.
- Being verbal is an excellent tool to keep action legal. A quick "keep it legal" reminds wrestlers and coaches to stay within the framework of the rules.

When the defensive wrestler come to a standing position

- As the defensive wrestler gets to their feet, the official should adjust their position to the head and hands of the wrestlers while preparing themselves to change directions quickly.
- Watch for kickbacks and cutbacks.

# Montana Wrestling Officials Study Club

## 2025-2026

- Watch for defensive wrestler holding offensive wrestler's hands simply to bait a stall call.
- Watch for defensive wrestler blocking on offensive wrestler's thighs to bait a stall call.
- Indicate control with authorized signal.
- The offensive wrestler must MAKE AN HONEST ATTEMPT (INCLUDES RISK) to return the defensive wrestler.
- In the rear standing position the match is not stopped for stalling.
- Be prepared to change positions quickly to catch locked hands. Also, there is reaction time for locked hands when the offensive wrestler is returning the defensive wrestler to the mat.
- Watch for a trapped arm return – try to stop it (potentially dangerous) if you can, and to penalize appropriately (illegal move) if it occurs.

### Secondary Topic:

In a feet to back situation

- Keep up with the flow of the action. It is easy to get caught out of position on throws.
- While on your feet, quickly get into a good spot to observe near fall criteria. Change levels if possible – signal the takedown, hold it up and then start the near fall count, if the situation lands in criteria) then drop down on the mat.
- Do not begin your near fall count until the defensive wrestler is in criteria.
- Whenever possible, use a verbal and visual count. Solid, controlled mechanics help sell close calls.
- Adjust your position to best view a fall.
- Ensure the defensive wrestler does not commit any illegal holds such as hands to eyes, face, etc.....

From the mat

- When the defensive wrestler is being turned into near fall criteria, lower yourself down to the mat.
- While down on the mat the official should stay in a position that maximizes their mobility and their view of the action.
- Don't begin your near-fall count until the defensive wrestler enters criteria.
- Stop your near fall count if a wrestler comes out of criteria.
- Give a clear, accurate verbal and visual count. This helps to prevent problems with coaches.
- Do not award near fall points until the "danger" has ended.
- Do not use any unauthorized signal such as moving your hand up and down to indicate a 90-degree angle or wave your hand back and forth to indicate a wrestler moved in and out of criteria.
- Do not shake your head to indicate a wrestler in or out of criteria.

# Montana Wrestling Officials Study Club 2025-2026

Session # 5

## **Precinct Theme:** Handling Timeouts and Pre-Match Duties

	<u>Primary Topic</u>	<u>Secondary Topic</u>
Topic	Injury, Recovery, HNC Timeouts	Pre-Match Duties
Leader(s)		

### **Primary Topic:**

Mechanics of Injury, Recovery, and HNC Timeouts:

- Unless it's obvious, confirm that the wrestler needs injury time
- Official should stay in position to see the wrestlers, coaches and the clock (ideally, at the table)
- Inform the coach at 1 minute, 30 seconds and 15 seconds
- Use Signal #7 to indicate when injury or recovery times stops
- Injury Time (1:30 total - cumulative)
  - Use Signal #4 to start Injury Time once a trainer or medical personnel has arrived on the mat
  - It is critical that the Official knows the proper sequence when a wrestler takes injury time in all situations – make sure the wrestlers restart in the correct position
- Recovery Time (2:00 per instance)
  - Use Signal #6 to start recovery time
  - Make sure wrestlers restart in the correct position
  - Recovery time is used as a result of an Illegal Action, Unsportsmanlike Conduct or Unnecessary Roughness
- Concussion Protocol (5 minutes)
  - Start the wrestler with Injury Time and inform the trainer that you suspect a possible HNC injury.
  - Allow the trainer to assess the athlete for a possible concussion
  - If the trainer indications a HNC time out, then the official will clear the Injury Time and use the proper signal to indicate an HNC time out.

### **Secondary Topic:**

Pre-Match Duties:

- Arrive at least 1 hour early – allow ample time for the commute
- Take pride in your appearance – ensure your uniform is clean, pressed, clean shoes, etc. Look professional.
- Inspect mat area to ensure compliance – notify home coach of any issues
- Speak w/ table workers and set expectations for their performance

# Montana Wrestling Officials Study Club

## 2025-2026

- Locate home management to inquire about security and health care professional
- Locate coaches of each team and arrange to speak to each team
- Conduct skin checks, weight class draw and weigh-ins
- Pre-match discussion w/ athletes
  - Keep it short & sweet – two to three minutes at most
  - Confirm starting weight
  - Ask to inspect special equipment
  - Discuss safety of the athletes
  - Discuss major rule changes
  - Discuss expectations related to stalling – what happens on the edge of the mat
  - Offensive wrestler responsible for returning defensive wrestler safely
  - Discuss your starting sequence in referee's position to reduce false starts
  - Ask for questions – answer as required
  - Thank them for their time and wish them good luck

# Montana Wrestling Officials Study Club 2025-2026

Session # 6

## Precinct Theme: Stalling

	<u>Primary Topic</u>	<u>Secondary Topic</u>
Topic	Neutral Stalling	Offensive and Defensive Stalling
Leader(s)		

### Primary Topic:

Stalling General Guidelines:

- The most difficult aspect of officiating wrestling is to understand stalling. You must develop a philosophy that will assist most situations. This is where the best officials are recognized above the good officials.
- Each wrestler is required to make an honest attempt to stay in the center of the mat and wrestle aggressively, regardless of position or the time or the score of the match. Action is to be maintained throughout the match by contestants wrestling whether in the top, bottom or neutral position. Both contestants, the coaches and officials should avoid the use of stalling tactics or allowing the use thereof.
- Stalling is one of the most subjective calls in wrestling because:
  - No two officials call Stalling identically.
  - No two officials recognize Stalling within the same time frame.
  - Consistency with Stalling is tough due to different dynamics in each match.
- Any delays directly related to shoes or shoelaces is an automatic stall call.
- It IS Stalling when a wrestler backs off the mat, or when either pushes or pulls the opponent off the mat.

Neutral Stalling Guidelines:

- What to recognize:
  - Continuously avoiding contact with opponent.
  - Preventing opponent from returning to or remaining in-bounds.
  - Playing the edge of the mat.
  - Continuously pushing or pulling with no shot attempt.
  - Repeatedly faking contact without follow-through.
  - Using an underhook or wrist control without a follow-through shot.
  - Collar tie pushing/pulling with no follow-through.
  - Single or double underhook without a shot attempt.
  - Wrist control (Single or Double) without attempt at a shot or to prevent opponent's shot.
  - With a forearm or head in a tied-up with no attempt at a shot or to prevent opponent's shot.

# Montana Wrestling Officials Study Club

## 2025-2026

- Repeatedly grasping or holding a leg with no attempt at follow-through to improve position.
- Repeatedly gasping or holding a leg to prevent opponent from scoring.
- Preventing opponent from returning to or remaining in-bounds.
- Standing behind an opponent in control of torso without an attempt to finish on the mat.
- Controlling a 2-on-1 (Russian Tie) without an attack attempt.
- Slowly straggling back from OB.
- Either or both wrestlers interlocking fingers in the neutral position.  
Official shall verbally warn wrestlers to stay out of the lock. If they do not release the hold, then the first offense is a stalemate - this is a warning to both wrestlers. Subsequent occurrences may warrant a stall call on either or both.
  - Be verbal and preventive.

### **Secondary Topic:**

#### Offensive Stalling:

- It is Stalling when the offensive wrestler does not aggressively attempt to break down the opponent AND attempt to secure a fall.
- It is Stalling when the offensive wrestler does not aggressively attempt to break down the opponent.
- What to recognize:
  - Keeping the heel held to the buttocks for a silent 5 second count.
  - Deep waist and wrist with no attempt to improve.
  - Hooking the back ankle of defensive wrestler for an extended period with minimal attempt to break opponent down (Western Hook).
  - Staying behind an opponent in a rear standing position without attempting a return to the mat.
  - Repeatedly using two legs and being unable to turn opponent resulting in a stalemate or repeated use of cross-body ride with no attempt to improve position.
  - Running an arm bar with opponent broken down on the mat with minimal attempt to improve.

#### Defensive Stalling:

- The defensive wrestler must work aggressively to escape or reverse their opponent.
- What to recognize:
  - Does the defensive wrestler initiate an escape or reversal?
  - Once broken down onto the mat, is the defensive wrestler working to build a base?
  - When the offensive wrestler comes off the hips creating space, does the defensive wrestler attempt to take advantage or are they content to lay flat?

## **Montana Wrestling Officials Study Club 2025-2026**

- Does defensive wrestler attempt to improve their position by trying to score?
- Lying on the mat with elbows tucked into the body.
- Lying on the mat with arms and legs spread apart (par terre).
- Grasping the opponent's hands and arms and just holding on.
- Forehead down on the mat and/or "balling up."
- Defensive wrestler repeatedly crawling off the mat, crawling to the edge or working toward out of bounds with no attempt to improve position constitutes stalling.
- The official does not stop the match when penalizing the defensive wrestler for stalling, unless it's the 2-point stalling.

# Montana Wrestling Officials Study Club 2025-2026

Session # 7

## **Precinct Theme:** Assistant Officials and Coach Interactions

	<u>Primary Topic</u>	<u>Secondary Topic</u>
Topic	Assistant Official	Coach/Athlete Interactions
Leader(s)		

### **Primary Topic:**

The Role of the Assistant Official:

- The Assistant Official (AO) is the first on and last off the mat.
- A good AO does not communicate with coaches during a bout. If a coach begins to question the AO, it is appropriate for the AO to point to the lead official (LO) to indicate questions are to be addressed to the LO only.
- A good AO helps to prevent missed calls, timing, and scoring situations.
- AO's must ensure the clock starts and stops correctly.
- AO's must ensure the correct match score is always displayed.
- AO's must know what wrestler has choice of positions at the end of a period.
- The AO should change levels to check for chokes in front headlock situations.
- The AO should be in ideal position to view out of bounds situations.
- Stay 180 degrees opposite the LO. A good AO anticipates the LO's movements.
- A good AO keeps up with stall warnings, penalties, and which wrestler scored first.
- To change positions near the boundary, the LO should move inside of the circle and the AO should take the outside of the circle.
- In Near-fall situations
  - AR should work to stay in the best position to see any potential infractions, out of bounds and the clock
  - In a feet to back situation that moves away from the LO, the AR should be ready to provide a silent verbal near fall count until the LO is in position to see the near fall
  - Ensure both wrestlers aren't doing anything illegal or that any situation becomes illegal through wrestling action
  - If an illegal move occurs, the AR should notify the LO. The call will be based on whether the situation was illegal or became illegal through wrestling action. The LO will then make the determination and the call
  - The AR may count down "4, 3, 2, 1, Time" in near-fall or potential near-fall situations at the end of the period but will not use hand signals when

# Montana Wrestling Officials Study Club

## 2025-2026

counting. Countdowns during the match periods should be at :45, :30 and :15.

- The AR shall watch the clock to help:
- See if enough time remains to score near-fall points (2, 3 or 4 seconds)
- To help with a “Fall Call” if the wrestler had the fall before the clock ran out

You are an officiating TEAM, and your goal should be to keep the wrestlers safe and get the calls correct. This is only possible if both Officials are fully engaged and communicate clearly and freely with each other during the match

Discussion with Assistant Official:

- Set expectations with your Assistant Official (AO) – communication is KEY.
- Talking points:
  - Clock is the number one priority – AO owns start/stop times.
  - Stay 180 degrees from Lead Official (LO) – if possible.
  - Look for backside violations that the LO can’t see.
  - Look for near-fall activity if action moves away quickly.
  - Cover frontside if action turns away from LO.
  - Location during timeouts.
  - Location for Neutral starts and Referee position starts.
  - Location at the conclusion of each match (top of key).
  - Discuss how to handle disagreements on calls.
  - AO to remain in circle w/ wrestlers during coach's conferences at table.

### Secondary Topic:

- Coach Misconduct
  - When talking to a Coach, do not stand chest-to-chest as it appears more confrontational (stand side to chest)
  - Listen first. Let the Coach be heard. Coaches are not always wrong.
  - If the Coach questions a call – and no change is made – and the Coach is not questioning score or timing – then the Coach MUST be given a Coaches Misconduct call.
  - The procedure for penalizing a Coach is critical:
    - Go to the center of the mat and calmly indicate and announce the infraction to the head table
    - Make sure the Coach is aware they’ve been penalized
    - Do not get emotionally involved. Be professional at all times.
    - If a Coach crosses the line, and an Unsportsmanlike Conduct is warranted, the Official should maintain composure and penalize the Coach in the same professional manner as the lesser penalty
- Unsportsmanlike Conduct

## **Montana Wrestling Officials Study Club 2025-2026**

- Official should constantly monitor and assess the intensity of the match and determine if the athletes are nearing a potentially volatile situation.
- If the situation is identified, the Official may stop the match and have a chat with both wrestlers in the center of the mat.
- Be preventative.
- NEVER turn your back on the wrestlers.
- If a situation can't be prevented, the Official should penalize the offending wrestler(s) in a calm and professional manner.
- The Official should also make the table and Coach(es) aware of the penalty.
