

Accessing and Utilizing Think Central for Go Math

<https://www-k6.thinkcentral.com/ePC/start.do>

Student usernames and passwords follow the same format. Your child should have this username in their agenda. If you do not have the student id, please email your child's teacher.

Username: (Student id number)@kasd.net

Password: Wolfpack1

After logging in to Think Central, students will have 3 choices:

Things to Do: This is where your child can view and complete assignments given by the teacher.

My Scores: Results of completed assignments can be viewed in this tab.

My Library: This section will be very valuable in delivering instruction and reviewing math skills. Some highlights in this section are the **Math on the Spot Videos**, **Interactive Student Edition** and **Animated Math Models** for instruction. There are some worksheets available for practice or to print in the strategic intervention icon or the student edition.

Math on the Spot Videos: Choose the grade level, select the chapter/topic, and select the lesson. The video gives an example of a specific skill. Each lesson correlates to a Go Math lesson in the student edition.

Interactive Student Edition: Choose the grade level, select the chapter/topic, and select the lesson. Each lesson is about 15 minutes. There is a lesson with guided student practice.

Animated Math Models: This feature is available only if you have adobe. You will select a specific skill. There is a lesson with guided and independent practice.

I tools: Itools allow you to use a number line, counters, etc. to practice operations or skills.

Mega Math: There is a choice of math games.
