

STEWARTVILLE PUBLIC SCHOOLS PESTICIDE NOTICE

Minnesota schools are required to inform parents/guardians and school employees that they may request to be notified prior to pesticide application on school property. Pesticides include chemicals which are used to control insects, weeds, rodents, and other pests as defined by M.S. 123B575, Subd. 9.

To provide required information, schools must maintain a list of parents/guardians and school employees who request notification. Schools must also provide information about individual pesticide applications upon request, including name of pesticide product, time and location of planned application.

Pesticides and non-chemical treatments may be used in combination in and around schools for a variety of reasons, including the control of pests which have the potential to bite, sting, spread disease, cause asthma, and/or trigger allergic reactions. Pesticides may also be used to prevent or control pests or weeds that are seen as nuisance.

The long-term health effects on children from the application of such pesticides or the class of chemicals to which they belong may not be fully understood. Children may be more susceptible to pesticides than adults due to their smaller size and rapid growth and development. Also their playful behavior may expose them to more pesticide residue.

To limit the potential pesticide exposure, this school district follows safety regulations to ensure pesticides are applied properly. All pesticide products, which are used in and around school buildings, are required to be registered with the Minnesota Department of Agriculture and the U.S. Environmental Protection Agency. In addition, school employees and certified and licensed applicators are required by state and federal law to comply with all requirements of the pesticide label, including building sites, application rates, re-entry intervals, posting, use of personal protective equipment, use restrictions, and disposal of the product label.

To be notified about pesticide application, please contact Belinda Selfors, Superintendent at Stewartville Public Schools, 301 2nd Street South West, Stewartville, MN 55976. Other questions you have regarding the District's pesticide management practices may also be directed to Belinda Selfors.
